

Product Bulletin

May 22nd, 2013

Bulletin No. **PB-018**

Affected Models: Adapter Plates Telehandlers, Wheel Loaders & TLBs (Pages 206-207)

Summary: These Adapter Plates are not designed for digging applications.

Detail: Adapter Plates, also referred to as “Tool Carriers” are **not** designed to be used in digging or pulling applications. This includes skid loader buckets and Grapple Buckets.

The Adapter Plates are designed for use with attachments such as Auger Drives, Brooms, Bale Spears, Pallet Forks etc.

Due to the weight and power of these types of prime movers, they are capable of producing tractive forces when digging or pushing that will damage and/or fail the Adapter Plate. See photo below.
